

SafeT facilitates citizens to report any disrupted civic amenities and untoward incidents such as accidents, mob rage/violations, garbage piling, emergencies and disasters etc. It has a mobile app for crowdsourcing, and a web app managed by the concerned office for finding and implementing a solution for the grievance pronto.

The business flow of a typical agency for implementing the solution is precisely mapped in SafeT. This can be interfaced or integrated with other information and management systems for redressing grievances.

SafeT is an ideal solution for Smart Cities without exception.
